

Wayambalanka

“ A domain of evolving and progressing “

Nikawewa too is a difficult village in the North western Province that has been selected to launch the e village program aimed at uplifting the living standards of people who are residents of Sri Lanka's difficult villages through the medium of information and communication technology. The main objective of it is to foster a sense of a secured successful future to these children who live away from towns. Most of the people who live in Nikawewa are poor. But their children are clever. The mode of livelihood for most of them is the cultivation of chenas. The parents are not in a position to support their children and families. Hence the welfare of these children have to be looked after by helping those who are in need. Doors to the new world should be opened to them. Nikawewa is a spectacular village situated in Kurunegala district lies beneath and surrounded by rocks. A visitor to Nikawewa village will not leave it unless being charmed by the loudness of it scenery. Imparting to children and adults of Nikawewa village the knowledge of English and the know - how of the computer in an asset which will upgrade their knowledge and standard of living.

The concept of an e village program in Sri Lanka was born in Mahavilachchiya, a difficult village, 40 km from Anuradhapura town. By now they are being recognized world wide. The Mahavilachchiya lads pose a challenge to their counterparts in the city. They are now being fed by web site www.horizonlanka.org. Following this concept as an introductory step, website www.wayambalanka.org is activated by now.

Our Aims

1. To improve childrens' knowledge of English
2. To make children computer literate.
3. Computer literacy to be given to adult villagers
4. The internet to be made a feature of to the time table in the daily routing of the villagers.
5. To give an opportunity to children through internet browse world over.
6. Talented children to be assisted to develop their skills further.
7. Familiarizing the villagers with new technological tools.
8. Provide assistance to the economic affairs of the village through the internet.
9. Finding employment for the unemployed youth.
10. Taking part in the development of the infrastructure facilities which have not yet been observed by village authorities.
11. To supply a computer to every home.
12. Making children familiar with computer laptop usage.
13. Bring up well bred children with good habits, moral values, abilities and concepts that would assure them to live harmoniously in any society.
14. Teaching karate to children for their self defense.
